

ABSTRACT OF THE DISCLOSURE

5 A bottle holder for supporting a bottle on a surface is
disclosed, and comprises a pad portion for resting on the surface
and bottle securing structure positioned on a face of the pad portion
for removably securing the bottle in position on the pad portion. A
second embodiment of the bottle holder supports a bottle on a
10 support, and comprises a stalk portion having first and second ends
and a bottle securing structure mounted on the first end of the stalk
portion for securing to the bottle.
